### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a walk aerator, classified in class 172, subclass 042.
- II. Claims 6-12, drawn to a walk aerator, classified in class 172, subclass 043.
- III. Claims 13-16, drawn to an aerator, classified in class 172, subclass 125.
- IV. Claim 17, drawn to an aerator, classified in class 172, subclass 022.
- V. Claims 18 and 19, drawn to an aerator, classified in class 172, subclass 081.
- VI. Claims 20 and 21, drawn to a walk aerator, classified in class 172, subclass 776.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V, and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility where the wheelbase is substantially equal to or less than the predetermined width of the coring swath. Invention II has separate utility since it comprises a ground following control system. Invention III has separate utility since it requires a plurality of crank arms. Invention IV has separate utility since it requires a single pulley. Invention V has separate utility since it requires a curved core deflecting surface. Invention VI has separate utility since it requires a biasing link. See MPEP § 806.05(d).

Art Unit: 3671

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J. Novosad whose telephone number is 571-272-6993. The examiner can normally be reached on Monday-Thursday 5:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached at 571-272-6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
